2015-2016
54th Edition

Institutions, Degree Data, and Personnel

Including program listings for technology teacher education, engineering teacher education, industrial teacher education, and trade & industrial teacher education.

Sponsored by:

**The Council on Technology and
Engineering Teacher Education**

Editor

George E. Rogers

Preface

It is my pleasure to compile and to edit the 54th edition of the *Technology and Engineering Teacher Education Directory*. Unfortunately the number of teacher education institutions along with the number of technology and engineering education graduates continues to decline. For the academic year data presented in this 54th edition, three institutions accounted for 36% of the baccalaureate graduates. Over 50% of the colleges noted four or fewer graduates with six schools having no graduates. This is an alarming trend that has plagued our discipline for decades.

The printing of this *Directory* was made possible by funding from Goodheart-Wilcox Publisher. The profession is indebted to Goodheart-Wilcox Publisher for their commitment to technology and engineering teacher education as evidenced through their continued funding of the *Directory*. The *Directory* is sponsored by the Council on Technology and Engineering Teacher Education (CTETE) and is provided to all CTETE members as well as to each institution listed within the *Directory*. Additionally, an electronic version is available on the CTETE website at <http://www.ctete.org/>.

Professionals interested in becoming members of CTETE should visit the Council's website. Membership and participation in CTETE can help promote the development and future growth of technology teacher education.

I sincerely hope the *Directory's* presentation of teacher education data will assist you in your professional endeavors.

George E. Rogers
Editor

Technology and Engineering Teacher Education Directory

Explanatory Notes

The *Directory* is arranged alphabetically, first as to the states; secondly by institutions within each state; and finally the personnel in each program.

Institutions were asked only to include faculty who spend the majority of their assignment in the area of engineering, technology, or industrial teacher education. Institutions were also asked only to include enrollment and graduation data for engineering, technology, and industrial teacher education majors. Data do not include general career and technical education majors.

Data are presented in the following pattern:

1. The full official name of the institution.
2. The full official name of the college where the teacher education program is located.
3. The full official name of the department where the teacher education program is located.
4. The mailing address, telephone number, and website of the teacher education program.
5. The contact information for the teacher education program coordinator.
6. The number of graduate assistantships offered for the 2015 - 2016 academic year.
7. The degrees awarded from July 1, 2014 through June 30, 2015.
8. The current student enrollment for the 2015 - 2016 academic year.
9. Teacher education program personnel listed by name, rank, highest degree earned, and teaching/administrative area.
10. Teacher education program personnel contact information including email and telephone number.
